

## Model H3 Blanket Splitting Saw

The H3 is designed specifically to split fiberglass or mineral fiber board or blanket as part of a continuous production line. The 30 inch bandsaw wheels can carry up to a 1-1/4 inch wide blade to give a fast and true cut in even the most dense board products. The saw position and blade motor are operator controlled from the side of the saw. A powered head raise and lower mechanism with digital readout allows for precise blade positioning.

### Features:

- 30 inch diameter blade wheels allow use of blades up to 1-1/4 inch wide.
- Standard 96 inch cutting width. Other sizes available.
- Standard 24 inch vertical blade position adjustment range. Other sizes available.
- 3 Hp variable speed blade motor.
- Standard operator controlled head position with digital readout. Fully automatic "move to position" network connectable control system available as option. .
